Join the workshop.

VENUE

Samnam Hall, 1F, College of Pharmacy (W6)
Chungnam National University
99 Daehak-ro, Yuseong-gu, Daejeon

REGISTRATION

Applications are open to all. If applications exceed capacity, participants may be selected through a separate review process.

PRE-WORKSHOP PREPARATION

Bring a laptop; R 4.5.1 or later is recommended.
Use RStudio, Positron or basic RGui.
An installation R script will be provided; complete a test run.
macOS is unsupported, even with a Windows emulator.
No prior RsNLME or population modeling experience required.
A working understanding of pharmacokinetics is desirable.

HANDS-ON WORKSHOP

RsNLME

Workshop 2027

Population PK
Modeling with R

FEBRUARY 22-23, 2027

MONDAY - TUESDAY

College of Pharmacy, Chungnam National University
Daejeon, Republic of Korea

From foundations to application.

01

22 FEB / DAY 1 | 09:00-17:00

Population PK & Structural Models

Introduction to population methods
Residual error models
Building structural models
One- and two-compartment models
First-order absorption and infusion

02

23 FEB / DAY 2 | 09:00-17:00

Covariate Models & Evaluation

Building covariate models
Hands-on covariate modeling
Diagnostic plots and VPCs
Parameter summaries and interpretation

Program and operating details are subject to change.

Learn. Model. Explore.

LEAD INSTRUCTOR

Stephen Duffull

University of Otago · Certara

WORKSHOP FACILITATORS

Hwi-yeol Yun

Pharmacotherapy Lab
College of Pharmacy, Chungnam National University

Jung Woo Chae

Clinical Pharmacy Lab
College of Pharmacy, Chungnam National University

Soyoung Lee

Clinical Pharmacology & Therapeutics Lab
College of Pharmacy, Chungnam National University

Practical guidance in R-based population PK modeling.
